**Sky's The Limit Discovery Night
Saturday June 8, 2013**

Destinations off the beaten track in Joshua Tree National Park and a tour of the night sky will highlight Sky's The Limit's Discovery Night on Saturday June 8th starting at 8:00 pm. Following presentations by Park Ranger Carey Goldstein and STL's Ray Yeager, the public will be invited to look through state-of-the-art telescopes at Saturn and other deep sky objects.

Families and life-long learners of all ages are welcome at this free event at Sky's The Limit Observatory and Nature Center, just north of the entrance to the Joshua Tree National Park on Utah Trail in Twentynine Palms.

Everyone is strongly encouraged to bring water bottles, chairs, and a small flashlight and to dress for unpredictable desert weather. Should severe weather cause the event to be cancelled, check the website for re-scheduling information. Children under 16 must be accompanied by an adult.

For more information call Rick at 760-366-9048, visit the STL web site at www.skysthelimit29.org or email contact@skysthelimit29.org. STL is an affiliate of the Basin Wide Foundation, a tax-exempt nonprofit organization. All donations support Sky's The Limit's educational programs.
